

The Junglefy ecoVert™ Pro system has been developed to meet the needs of architects, builders and contractors by providing a beautifully simple, strong and lightweight green wall system. Architects and designers will love the versatility and flexibility offered by the ecoVert™ Pro system whilst contractors will find its simple, robust but lightweight construction, a pleasure to install.

Environmentally the ecoVert™ Pro ticks all the boxes. Seeking GECA certification, Junglefy means business when it comes to environmental best practice.

Not only are ecoVert™ Pro modules recyclable they are manufactured from locally sourced, 100% post industrial plastic waste. From design, prototyping, testing and manufacturing, ecoVert™ Pro is 100% Australian made and owned.
